Experience

Frontend Web Developer   2021 - 2022

Capgemini | Fundão

Was part of two projects mainly as a frontend developer. Worked on UI/UX, new implementations and bug fixing in terms of functionality and design. I was also responsible for maintaining code quality, do code reviews and implementing frontend unit tests. Occasionally I would work in the backend and database for simpler tasks.

Education

Bachelor Degree in Computer Science   2014 - 2019

University of Beira Interior | Covilhã

Took a bachelor degree in computer science where I could experience and work with a wide variety of programming languages, technologies and concepts. It also gave me the possibility to improve my soft skills by working on projects with my peers for many subjects.

Erasmus Program   2017

Politechnika Białostocka | Białystok

Studied in Białystok for a period of 5 months during my bachelor. This experience was very positive for my communication and the fact I was living in a diferent country than mine. I was also introduced to other concepts I didn't know, like robotics and unit testing.

Personal Projects

Handball Legends   2019

Bachelor's dissertation final project. Development of a web based game about managing a handball team. The user/player could manage his own team through a created account on the website. It was possible to have matches between other players through a simulation, which was the core feature of the project.
Technologies used: HTML & CSS, Bootstrap, PHP, JavaScript and MySQL.

Personal Website   2023

Developed a personal responsive website to serve as a portfolio about me and my work. This website serves as a way to promote myself both professionally and personally.
Technologies used: HTML & CSS, Bootstrap, TypeScript, Angular.
